

MULTI CHANNEL RESCUE DRAIN

Efficient water management solution for crawlspaces and basements

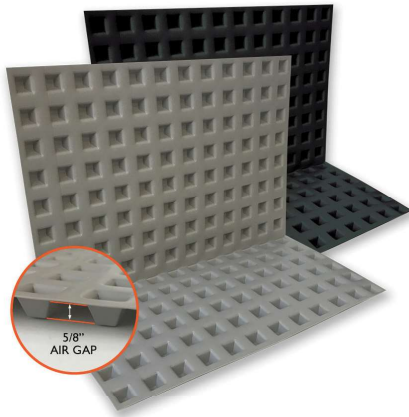

- ▶ Streamlines water removal in crawl spaces and basements
- ▶ Removes 70% more water than traditional methods
- ▶ Ensures sturdiness and efficient water intake
- ▶ Simplifies installation with compact design

Product # FRMCDrain6

The Multi Channel Rescue Drain redefines water removal in crawl spaces and basements, offering a low-labor solution. Its compact design ensures effortless installation with minimal excavation, outperforming traditional methods by removing 70% more water. Wrapped with non-woven filter fabric, it replaces conventional gravel-covered pipe drainage. Boasting 11,400lbs/ft² of compression strength, it remains sturdy under pressure. With 85% open space for water intake, it efficiently manages water flow.

TWO STAGE BASEMENT DRAINAGE BOARD

Product # RD1001G

Channels water to drain tile, for use on standard waterproofing projects and thin floor applications

- ▶ Integrates drainage and structural support technologies
- ▶ Channels water effectively to drain tiles and sump pumps
- ▶ Suitable for standard waterproofing and thin floor applications

Product # FRMCDRAIN6

Multi Channel Rescue Drain

Efficient Water Management Solution for Crawl Spaces and Basements

The Two Stage Basement Drainage Board effectively channels water to drain tiles and sump pumps, integrating with wall panels and vapor barriers. It restores structural integrity by providing contact points for re-poured concrete against walls and footings. Additionally, it can be used for standard waterproofing and thin floor applications.

**RESCUE POP UP
DRAIN**

Efficiently divert water,
maintaining dry spaces
with minimal effort.

Product #RDPopUp

**RESCUE LAWN
DRAIN**

Efficiently redirects water
away from foundations,
simplifying drainage setup
for sump pumps and
downspouts.
