

# RESCUE DRAIN CHANNEL

Product # RD17596

## Innovative solution for basement waterproofing with efficient water diversion

- ▶ Efficient water diversion at the top of the footer
- ▶ Sloped pipe design reinforces concrete floors, reducing cracking
- ▶ Built-in 4" flange directs water away from the foundation
- ▶ Stone-free installation that reduces costs and installation time
- ▶ Proudly made in the USA, ensuring quality and reliability

Rescue Drain Channel offers a revolutionary solution for interior basement waterproofing. Its innovative on-footer design includes a rear angle to accommodate debris against the wall, ensuring efficient water drainage. The sloped pipe design enhances structural support, creating a thicker concrete floor to minimize cracking. With a built-in 4" flange acting as a water diverter, along with recommended vapor barrier installation, Rescue Drain Channel provides comprehensive moisture control for lasting protection.
