- ▶ Standard anchor with 84" Channel Product # 13136

The Grip-Tite basement wall anchor system utilizes proven engineering methods to secure and stabilize deteriorating basement walls. Walls that are affected by leaning, tilting, bowing, or cracking can be corrected using our innovative and effective foundation wall anchors. Our system consists of an interior wall plate, exterior soil anchor, connecting steel rod, and hardware designed to stabilize and support weak or failing basement walls. This cost-effective system features a minimally invasive installation process and requires little maintenance during the course of its lifetime. ICC-ES Evaluated

**STANDARD ANCHOR**  
(2) 12" x 18" plates

Product #10608

**MEDIUM ANCHOR**  
12" x 18" plate with a 12" x 28" plate

Product #10615

**LARGE ANCHOR**  
(2) 12" x 28" plates
